POWER PICKS

The spa world has always had a huge emphasis on scent—relying on ingredients that not only smell good, but also have the added benefit of aromatherapy. These three new launches merge that age-old tradition with modern science to deliver skin care that simply works.

01 Hand Helper

Laced with lavender and vitamin-rich botanicals, this rich formula heals even the driest skin while making your hands look instantly better, yet it never feels greasy.

02 Mega Mask

Whether they hydrate or tone, masks are all the rage. This one does both and has hyaluronic acid and an accompanying rollerball serum that lets you keep up the benefits during the day.

03 Glow Inducer

This jasmine-infused cream has a specific goal: to make your skin appear more awake. The result is a dewy complexion that looks like you just had a serious night of sleep.
